IMS Scholarship

Dear To Whom it May Concern:

It is my pleasure to recommend **Sani Ibrahim Sani** for admission to Computer Science and Technology at [name of university]. I am a four-year Bsc.. student at the University of China, Berkeley. I came to know Sani when I was his

Graduate Student Instructor for Electrical Machine MEC111: Ethical Relativism, taught by Professor John Smith. The course comprised [short description of course]. Sani distinguished himself by submitting an exceptionally well researched and interesting project on solar tracker using savor motor. I would rank him in the top 2% of students that I have taught in the past five years in respect of her writing ability and research skills.

Overall, Sani is highly intelligent and has good analytical skills. Her project on solar tracker using savor motor his ability to come a detailed understanding of the ethical practices of another, very different, culture, and to analyze the consequences of those practices for contemporary ethical theories. He gave a particularly interesting discussion of the difficult practice of infanticide, and showed both sensitivity and detachment when discussing its ethical consequences. His overall intelligence is also reflected in his grades for the course, which were by far the best in the class.

Sani has excellent communication skills. His written work is both clear and concise, as well as interesting to read. She demonstrated her oral articulateness in the discussion sections that were an integral part of the course. Each discussion section focused on a particular ethical dilemma. Students were required analyze morally problematic situations, and to develop and argue for their own ethical views with regard to the issue in question. Sani was highly proficient in applying the course material in analyzing the problem situations.

He always explained his views very concisely and gave supporting arguments that were both clear and persuasive. Sani also demonstrated good teamwork skills in group assignments.

At a personal level, Sani is a well-disciplined, industrious student with a pleasant personality. he went well beyond the course requirements in the quantity and quality of his project, putting in a lot of extra research and attending office hours every week. Throughout the course, Sani demonstrated great perseverance and initiative. Not only was she interested in and motivated to learn the material, but she also put great work into assimilating it to his own experience and developing his own ideas about each ethical topic that we discussed.

Sani is unquestionably an exceptional candidate for graduate in Kano State Polytechnic Department of Electrical and Electronics Engineering.

Suggests that he would greatly benefit from the opportunities for intellectual development provided by a sustained period of graduate study. She has proven herself to have the perseverance, initiative, and

Intellectual creativity necessary to complete an advanced graduate degree. I would therefore highly recommend Sani Ibrahim. If he performance in my class is a good indication of how he would perform as a graduate student, he would be an extremely positive asset to your program.

If I can be of any further assistance, or provide you with any further information, please do not hesitate to contact me.

Yours sincerely,

Sani Ibrahim Sani
