

Applicant name: MUHAMMAD JUNAIDU SANI

Nationality: Nigerian

Applying for: Masters in PHYSICS

Email Address: muhammadeenjunaaid@gmail.com

- ***Academic Background***

My name is Muhammad Junaidu Sani and I was born in Dala town, Kano State, Nigeria. On April 21st, 1996. I am a person who is always wanted to create something that is new and useful to the society. When we observe our surrounding we discover numerous beautiful products in our world. Nature is beautiful: physics is the apprehension of that beauty realization of the very part made me out this subject as my career. I want to spend my whole life delving into the depth of this boundless ocean of wonders. This camp, I feel is a pivot step in that direction, with the intention of understanding these magnificent life form. I have chosen to pursue the study of advance physics

On my journey towards this massive achievement, I successfully completed my Bachelor's in physics from kano university of science and technology, Wudil, which is among the best university in Nigeria. I achieved an impressive CGP of 3.58 out of 5, securing Upper Second Class Honor.

- ***My Personality***

I am socially active person with friendly nature, a good communication or indeed, who is blessed with many friends, I keep a keen view to the reality of life thus approach people with positive mind and attitude and always prove to be helpful with honest effort and true dedication. Besides that, I always feel very joyous and fortunate to meet and greet people belonging to different backgrounds and culture. As such meetings those people are always important because they prove to be beneficial in future, also it makes things easy to cope whether in work or study in own country or outside the country.

- ***My Skills***

Throughout my years of education, I have developed a diverse set of skills, encompassing both academic and practical aspects of daily life. Studying in a top-ranked university exposed me to a highly diverse environment, fostering excellent communication skills, as well as proficiency in management and leadership.

- ***Research Achievement***

In my undergraduate program, I have studied the course Research plan and tools in which we have to select a topic for research and document the same. I have already successfully completed my research literature review research on use of spontaneous potential geophysical method.

- ***Study Plan in China***

My main educational goal is to gain Master's degree in physics Master physics tells us how you can improve the quality and efficiency of manufacturing system. My second educational goal is to learn to speak Chinese because Chinese is becoming global language. So, I feel it is necessary to learn it. I would like to apply for the Master's Degree in physics in China.

As far as I am concerned, this challenging profession is what I am most interested in, is one which can allow me to apply my knowledge and expertise to face challenges. I hope that after completing master studies I would be able to take part in maximizing my country research technology in such fields to benefit its economy. I believe that this master degree will provide me with the chance to get to know about the manufacturing processes. I hope that I can gain more experiences in dealing with the situation, people, systems and demands which will be of great help in my future career.

- **Reason to Study in China**

As all world knows that in very less time china can grow herself and become popular country in the world in almost all aspects. During lectures teacher told us about how fast China is growing in economy and business. So I started taking interest to study in China. Language is not an issue. Through hard work I can overcome this barrier. Watching the news, analyzing and observing the people of China, I am impressed by the way, these individuals have proved themselves to be dedicated to their work and with true efforts they have set China as a successful example for other third world or developed countries.

The fast-growing economy, technological advancement and the global ranking education institutes of China with high reputation makes a great aspiration to the students and professionals for the better career perspectives. Thus, such kind of positivity has boosted my confidence further and I am highly satisfied with the decision I have taken. Moreover, China's diverse cultural norms and values, the famous gentle hospitality of its people and Nigeria-China all weather friendly relations since post to promote bilateral trade, acceptance and peace to both sides in great clarity make me feel China as my second homeland; also, my family fully support my choice for China being my preference for graduation study. By putting all these reasons together, shows China an ideal place for me to do my Master's Degree.

- **Conclusion.**

China, with its profound emphasis on education, especially higher education, has significantly shaped my academic journey. The dynamic academic atmosphere, characterized by productive academics and students displaying respect and serious dedication to their studies, has been a truly enriching experience. China houses several top tier institutions, many of which hold esteemed positions in global university rankings.

Motivated by this experience, my commitment extends to contributing meaningfully to the field through the publication of research papers and aspiring to become a distinguished member of the scientific community.

Thanks

Kind regards,

MUHAMMAD JUNAIDU SANI
