### PROFESSIONAL SUMMARY

Compassionate and results-driven public health professional with over 5 years of experience in healthcare settings, including nursing leadership, program coordination, and community health improvement. A Master's degree holder in Public Health and preventive medicine, with strong expertise in project management, community engagement, data analytics, and malaria control strategies. Proven record of accomplishment in leading health initiatives, managing cross-functional teams, and implementing evidence-based strategies to improve health outcomes, particularly in malaria prevention and care.

### EXPERIENCE

#### **Head of Nurse**

*Women's Health Fertility Solutions Specialized Clinic* | 2021 - Present

- Lead a team of nurses and healthcare professionals, overseeing patient care, resource allocation, and staff coordination.
- Ensure compliance with clinic policies and procedures while delivering high-quality, patient-centered care.
- Develop and implement patient care plans, monitor patient progress, and adjust treatments as necessary.
- Resolve patient and staff issues, manage conflict, and foster a collaborative, efficient work environment.

#### **Clinical Nurse (Malaria Interventions)**

*Consolari Dispensary, under RBC Partnership* | 2019 - 2020

---

- Coordinated malaria prevention and control activities within the dispensary, under the Rwanda Biomedical Centre (RBC) partnership.
- **Malaria Case Management:** Provided diagnosis, treatment, and follow-up care for malaria patients, ensuring adherence to national treatment protocols.

- **Community Engagement & Education:** Led awareness campaigns on malaria prevention, such as the importance of using insecticide-treated bed nets and environmental management.
- **Training & Capacity Building:** Conducted training sessions for healthcare workers and community health volunteers on malaria case management, prevention, and monitoring.
- **Inventory & Resource Management:** Managed malaria-related supplies such as medications, diagnostic tools, and bed nets, ensuring proper distribution and usage in line with national guidelines.
- **Monitoring & Evaluation:** Supported the monitoring and evaluation of malaria programs, ensuring alignment with national malaria control strategies and identifying areas for improvement.

## Nurse

*Kicukiro Health Center* | 2015 - 2016

---

- Delivered education and counseling to patients on a wide range of health issues, particularly maternal and child health.
- Developed and implemented care plans, ensuring patients received comprehensive care tailored to their needs.
- Managed medication distribution and monitored patient progress, adjusting care plans as necessary.
