# Study Plan for Bachelor's Degree in Computer Science and Technology

## Introduction

I am Sani Ibrahim Sani, an aspiring student aiming to pursue a Bachelor's Degree in Computer Science and Technology, commencing in March 2025. My objective is to gain a robust and comprehensive education in Computer Science, which will equip me with the necessary skills and knowledge to make significant contributions to my home country, Nigeria, after graduation.

## Background

Born and raised in Nigeria, Kano State, I graduated from Kano State Polytechnic in 2024 with an excellent academic record and a strong interest in Electrical and Electronic Engineering. My high school education provided me with a solid foundation in business principles and sparked my passion for a career in the field of engineering. The satisfaction I derived from studying business subjects motivated me to pursue higher education in this dynamic field.

## Why Study in China?

China has established itself as a global leader in business and economics, making it an ideal destination for studying computer. The country's rapid economic growth and development offer a dynamic environment for learning and experiencing business practices firsthand. Additionally, China's cultural diversity and rich history provide a unique perspective on global business strategies and operations. Studying in China will give me the opportunity to interact with top marketing professionals, participate in cutting-edge business research, and gain valuable insights into the computer science and technology and also the global business landscape.

## Detailed Study Plan

Title: Study Plan for B.Sc Honors in Computer Science. Introduction: My name is Sani Ibrahim Sani, and I am thrilled to have the opportunity to apply for the undergraduate scholarship in computer science. As a passionate and dedicated individual, I am eager to pursue a degree in computer science to further develop my knowledge and skills in this rapidly evolving field. The scholarship would not only provide financial support but also serve as a validation of my academic achievements and potential. Academic Goals: During my undergraduate studies, I aim to specialize in artificial intelligence and machine learning. These areas of computer science have always fascinated me due to their potential to revolutionize various industries and tackle complex problems. I am particularly interested in exploring how AI can be applied to healthcare

and environmental sustainability. By delving into the theoretical foundations and practical applications of AI, I hope to contribute to advancements in these critical areas. Course Selection: To achieve my academic goals, I have carefully selected a range of courses

that will provide a well-rounded education in computer science. These include foundational courses such as Introduction to Computer Science, Data Structures and Algorithms, and Computer Systems. I plan to also take advanced courses in Machine Learning, Natural Language

Processing, and Computer Vision to deepen my understanding of AI and its various subfields

## Conclusion

Studying in China will provide me with a world-class education in computer, equipping me with the skills and knowledge necessary to excel in the business world. I am enthusiastic about the opportunity to learn from esteemed faculty and gain valuable experience in China's dynamic business environment. I look forward to contributing to and benefiting from the vibrant academic community.

Thank you for considering my application.

Sincerely,

Sani Ibrahim Sani
